Summary

Software developer who ships end-to-end – from React/Next.js interfaces through Node.js APIs and PostgreSQL schema design to production monitoring. Nearly 2 years building D2C commerce platforms handling 1M+ daily views, plus a multi-tenant SaaS built solo and now running live for real businesses.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, Zustand, Context API

Backend: Node.js, Express.js, NestJS, REST APIs, Authentication, BFF Architecture

Databases: PostgreSQL, MongoDB, MySQL, Drizzle ORM

Testing: Jest, React Testing Library, Postman, Chrome DevTools

Cloud / DevOps: AWS, Docker, Git, GitHub Actions, CI/CD, Vercel

Monitoring / Analytics: Sentry, GA4, PostHog, Meta Pixel, Meta Conversions API

AI Tooling & Integration: Claude Code, Cursor, GitHub Copilot, MCP Servers, LLM API Integration, Prompt Engineering

Problem Solving: 700+ DSA problems solved on [LeetCode](#), with strong algorithmic thinking and optimization skills

Education

Indian Institute of Information Technology (IIIT), Dharwad

B.Tech in Computer Science and Engineering

Karnataka, India

2020 – 2024

Experience

Software Developer (SDE-1)

Primathon Software Pvt. Ltd.

Jan 2025 – Present

Gurugram (Delhi-NCR)

- Built production-grade full-stack applications using React.js, Next.js, TypeScript, Node.js, PostgreSQL, and MongoDB, designing and integrating 29+ REST APIs across authentication, analytics, search, checkout, and customer workflows.
- Developed reusable components and scalable multi-tenant storefront architecture powering live D2C platforms – Aqualogica, Wellversed, and PlixKids – serving 1M+ daily views, raising Lighthouse scores from 65 to 90 and reducing LCP by ~40% through code splitting, lazy loading, and caching.
- Delivered end-to-end features for Care41, a healthcare booking platform, spanning frontend portals, backend APIs, database, and authentication, while resolving production issues using Sentry, Chrome DevTools, and root-cause analysis.
- Collaborated with product, design, backend, and QA teams across Agile sprints, contributing to code reviews, technical documentation, and deployment support, while using Claude Code, Cursor, and MCP Servers to improve delivery speed and code quality.

Software Developer Intern

Coding Blocks Pvt. Ltd.

Aug 2024 – Dec 2024

Remote

- Developed reusable UI modules and integrated REST APIs using React.js, JavaScript, TypeScript, and Node.js.
- Supported debugging, code reviews, documentation, and feature enhancements within an Agile team.

Projects

Construction Saathi | Next.js, NestJS, PostgreSQL, TypeScript, AWS, CI/CD, REST APIs

[Live](#) | [GitHub](#)

- Built and shipped a multi-tenant construction-management SaaS as a solo developer – a monorepo spanning web and API layers across 11 modules including site progress, ledgers, materials, fuel, fleet, approvals, and Excel reporting.
- Onboarded 2 construction companies now running daily site operations on the platform, recording live expenses, and material entries from the field.
- Designed a six-level role hierarchy with scope-based permissions enforced through NestJS guards, and shared-schema multi-tenancy using PostgreSQL row-level security with tenant context derived from JWT claims.
- Enforced financial integrity through dual-approval verification, per-role spend limits, and backdating restrictions, with full audit trails and one-click Excel export for owner reconciliation.

Storefront Builder | Next.js, React, TypeScript, Node.js, PostgreSQL, MongoDB, REST APIs

- Architected a multi-tenant e-commerce platform with theme-driven widgets and API-driven page rendering, letting marketing teams update storefront pages without engineering involvement.
- Delivered live storefronts for Aqualogica, Wellversed, and PlixKids at 1M+ daily views, cutting bundle size ~25% and instrumenting GA4, PostHog, and Meta Pixel for conversion tracking.
