

MAHENDRA SINGH PUNIYA

☎ +91-7568265755 | ✉ mahendrapuniya92@gmail.com | [in](#) [pooniyamahendra](#) | 🧑 [Portfolio](#)

Summary

Frontend Engineer with 1.5 years of production experience architecting scalable web applications using **React.js**, **Next.js**, and **TypeScript**. Delivered **3** multi-merchant e-commerce storefronts and a healthcare booking platform — driving **40%** load-time reduction, full-funnel analytics, observability, and **AI-driven** engineering pipelines.

Education

Indian Institute of Information Technology Dharwad, Karnataka

Bachelor of Technology (Computer Science and Engineering)

2020 – 2024

CPI: 7.0

Experience

Associate Software Developer

Primathon Software Pvt. Ltd.

Jan. 2025 – Present

Gurugram, India

- Core contributor on **Storefront-Builder**, a multi-merchant Next.js **e-commerce** platform — a performance-tuned alternative to Shopify focused on **SEO**, conversion, and merchant growth — onboarded and launched **3** production storefronts end-to-end for high-traffic D2C brands [Aqualogica](#), [Wellversed](#), and [PlixKids](#).
- Engineered reusable storefront modules (product pages, cart, checkout, search, filters) deployed across the multi-merchant platform, accelerating onboarding for new merchants.
- Implemented end-to-end e-commerce analytics across merchant storefronts — **GA4**, **PostHog**, and **Meta Pixel + Conversions API** — with dual client/server tracking, event deduplication, and full-funnel instrumentation, improving attribution accuracy.
- Spearheaded **AI-augmented** development workflows on the team using **Claude Code** and **Cursor** — built automation pipelines with custom skills, task-specific agents (PM/Coder/QA personas), and plugins for project scaffolding, code review, and test generation.
- Designed **AI-powered** frontend replication workflows and reusable prompt patterns — converting production websites into pixel-accurate Next.js implementations, accelerating merchant onboarding and raising team productivity.
- Improved **Core Web Vitals** (LCP, CLS, INP) across merchant storefronts — audited bundle size, refactored critical rendering paths, tuned image/font loading, and implemented advanced caching (**ISR**, edge caching, TanStack Query) — lifting Lighthouse scores to **90+** and reducing page load time by **40%**.
- Integrated **Sentry** with **Slack** alerting across production storefronts — real-time error tracking, performance monitoring, source-map-aware stack traces, priority-based routing, release tracking, and per-merchant segregation — reducing MTTR and catching regressions before impacting merchant revenue.
- Delivered end-to-end [Care41](#), a multi-level healthcare booking platform — built pixel-perfect user & admin portals with CMS-driven lead capture, multi-stage booking management, role-based access, and full API integration.

Achievements & Activities

- Active frontend ecosystem enthusiast — track shipping releases across React, Next.js, and Vercel; study architectural patterns from leading practitioners and apply them to production work.
- Solved **700+** Data Structure & Algorithm problems on [LeetCode \(mahendra92\)](#), strengthening algorithmic problem-solving and time-complexity analysis.
- Researching the frontier of **AI-assisted** engineering — prototype with Claude Code, MCP servers, custom slash commands, and multi-agent coding pipelines; document learnings and share patterns internally.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, C++, Python

Frontend & UI: React.js, Next.js (App Router, Server Components, SSR, SSG, ISR), React Native, Tailwind CSS, Bootstrap, Styled Components, shadcn/ui, Framer Motion, Responsive Design .

AI Engineering: Claude Code, Cursor, Roo Code, MCP Servers, Prompt Engineering, Multi-Agent Workflows, Custom Skills & Plugins

State, Data & Auth: Redux, Zustand, Query, JWT, Firebase Authentication, OAuth 2.0 .

DevOps & Cloud: Git, GitHub, GitHub Actions, Vercel, AWS, Netlify, CI/CD Pipelines, Docker, Linux, Bash

Analytics & Observability: Google Analytics 4, PostHog, Meta Pixel + Conversions API, Sentry

Tools : Figma, Postman, Chart.js, Jira, Notion, Slack, Agile, , Git, GitHub, Vercel, AWS, Netlify, CI/CD Pipelines, Docker, Linux, Bash

Profiles: [GitHub \(mahendra2811\)](#), [LeetCode \(mahendra92\)](#), [GeeksforGeeks \(mr_hatke\)](#)
