Summary

Full Stack Developer with 1.5+ years of production experience architecting scalable end-to-end web applications. Delivered multi-merchant e-commerce platforms and a healthcare booking platform — driving API design, database modeling, observability, and AI-assisted engineering.

Education

Indian Institute of Information Technology Dharwad, Karnataka

2020 – 2024

Bachelor of Technology (Computer Science and Engineering)

CPI: 7.0

Experience

Associate Software Developer

Jan. 2025 – Present

Primathon Software Pvt. Ltd.

Gurugram, India

- Core contributor on **Storefront-Builder**, a multi-merchant Next.js **e-commerce** platform built on a **BFF architecture** with 29+ API endpoints — onboarded and shipped end-to-end production storefronts (frontend, backend, and database layers) for high-traffic D2C brands [Aqualogica](#), [Wellversed](#), and [PlixKids](#).
- Designed and built reusable frontend components and backend services across the multi-merchant platform — product APIs, cart orchestration, checkout flow, and search — accelerating merchant onboarding.
- Implemented end-to-end e-commerce analytics across merchant storefronts — GA4, PostHog, Meta Pixel + **server-side Conversions API** — with dual client/server tracking, event deduplication, and full-funnel instrumentation.
- Pioneered AI-assisted development on the team using **Cursor**, **Roo Code**, and **Claude Code** — created automation pipelines with custom skills, task-specific agents (PM/coder/QA personas), and plugins to handle project scaffolding, code review, and test generation.
- Designed AI-assisted full-stack replication workflows and reusable prompt patterns — converting production websites into pixel-accurate Next.js implementations with backend integrations, accelerating merchant onboarding and raising team AI productivity.
- Integrated **Sentry** with Slack alerting across frontend and backend layers of production storefronts — real-time error tracking, performance monitoring, source-map-aware stack traces, priority-based Slack routing, release tracking, and per-merchant segregation — reducing MTTR and catching regressions before impacting merchant revenue.
- Owned end-to-end delivery of [Care41](#), a multi-level healthcare booking platform — built REST API endpoints, database schemas, authentication flows, and pixel-perfect user & admin portals with CMS-driven lead capture, multi-stage booking management, and role-based access control.

Achievements & Activities

- Active full-stack ecosystem enthusiast — track shipping releases across React, Next.js, Node.js, and database tooling; study architectural patterns from leading practitioners and apply them to production work.
- Solved **700+** Data Structure & Algorithm problems on [LeetCode \(mahendra92\)](#), strengthening algorithmic problem-solving and time-complexity analysis.
- Researching the frontier of AI-assisted engineering — prototype with Claude Code, MCP servers, custom slash commands, and multi-agent coding pipelines; document learnings and share patterns internally.
- Earned [NCC 'B' Certificate](#), demonstrating leadership, discipline, and team coordination.

Skills

Languages: JavaScript (ES6+), TypeScript, Node.js, HTML5, CSS3, SQL, C++, Python

Frontend: React.js, Next.js (App Router, Server Components, SSR, SSG, ISR), Vue.js, React Native, Tailwind CSS, shadcn/ui, Framer Motion, Responsive Design

Backend: Node.js, Express, REST APIs, GraphQL, BFF Pattern, Server Actions, Edge Functions, Webhooks, Microservices

Databases & ORM: PostgreSQL, MongoDB, MySQL, Drizzle ORM, Prisma, Redis, Database Design, Indexing,

Authentication & Security: JWT, Firebase Authentication, Supabase Auth, OAuth 2.0, RBAC, Session Management.

Build & Tooling: Vite, Webpack, Turbopack, Bun, npm, pnpm, yarn, ESLint, Prettier, Babel

DevOps & Cloud: Git, GitHub, GitHub Actions, Vercel, AWS, Netlify, CI/CD Pipelines, Docker, Linux, Bash

Analytics : Google Analytics 4, PostHog, Meta Pixel + Conversions API, Sentry, Lighthouse, Core Web Vitals

AI Engineering: Claude Code, Cursor, Roo Code, MCP Servers, Prompt Engineering, Multi-Agent Workflows, Custom Skills & Plugins

Design & Collaboration: Figma, Storybook, Postman, Chart.js, Jira, Notion, Slack

Methodologies: Agile, Scrum, Code Reviews, Pair Programming, API Design, Performance Optimization

Profiles: [GitHub \(mahendra2811\)](#), [LeetCode \(mahendra92\)](#), [GeeksforGeeks \(mr_hatke\)](#)
